Introduction

Thank you for purchasing the BrewMaster Pro 5000 by CaféTech. This premium smart coffee maker is designed to deliver barista-quality coffee in the comfort of your home. This user manual will guide you through the setup, operation, and maintenance of your new coffee maker to ensure you get the most out of your brewing experience.

Getting Started

Package Contents

- BrewMaster Pro 5000 Coffee Maker
- 12-cup glass carafe with lid
- Removable water filter
- Stainless steel permanent filter
- Cleaning brush
- Water hardness test strip
- Quick start guide
- This user manual

Before First Use

1. Remove all packaging materials and stickers
2. Wipe the exterior with a damp cloth
3. Wash removable parts (carafe, filter basket, water tank) with warm, soapy water
4. Run 2-3 brewing cycles with water only (no coffee) to clean internal components

Product Overview

BrewMaster Pro 5000 Components Diagram

1. 7-inch color touchscreen display
2. Built-in conical burr grinder
3. Bean hopper (capacity: 8oz)
4. Water tank (capacity: 1.8L)
5. Brewing chamber
6. Milk frother
7. Dispensing spout
8. Drip tray
9. 12-cup carafe
10. Control panel
11. Power button

Connectivity	Wi-Fi, Bluetooth 5.0
Power	1500W, 120V
Dimensions	12.5" x 16.8" x 14.2"
Weight	22 lbs

Setup and Installation

Positioning Your Coffee Maker

- Place on a flat, stable surface
- Allow at least 4 inches of clearance on all sides for ventilation
- Position near a grounded electrical outlet
- Keep away from heat sources and water splashes

Initial Setup

1. Insert the water filter into the water tank
2. Fill the water tank to the MAX line with fresh, cold water
3. Plug in the coffee maker and press the power button
4. Follow the on-screen setup wizard to:

- Set language preferences
- Connect to Wi-Fi network
- Set water hardness (use included test strip)
- Set date and time
- Create your first user profile

Connecting to Wi-Fi

1. From the main menu, tap "Settings" > "Network"
2. Select your Wi-Fi network from the list
3. Enter your network password using the on-screen keyboard
4. Tap "Connect"
5. Once connected, you can download the CaféTech mobile app to control your coffee maker remotely

Basic Operation

Brewing a Carafe of Coffee

1. Fill the water tank with fresh, cold water (observe MIN/MAX markings)
2. Add whole beans to the bean hopper or ground coffee to the filter basket
3. Place the carafe on the warming plate
4. From the main screen, select "Carafe Brew"
5. Adjust settings if desired (strength, temperature, grind size)
6. Press "Start Brewing"

Single-Serve Options

1. Place your cup on the drip tray
2. From the main screen, select "Single Serve"
3. Choose your desired beverage (Espresso, Americano, Cappuccino, Latte)
4. Adjust settings if desired
5. Press "Brew Now"

Using Pre-Ground Coffee

1. Press the "Ground Coffee" button on the display
2. Open the ground coffee compartment lid
3. Add your pre-measured ground coffee (1 tbsp per cup recommended)
4. Close the lid and continue with your brewing selection

Advanced Features

Precision Brewing Technology

The BrewMaster Pro 5000 features advanced PID temperature control that maintains optimal brewing temperature within 1°F accuracy. This ensures perfect extraction for maximum flavor from your favorite beans.

To adjust brewing temperature:

1. From the main menu, tap "Settings" > "Brewing Parameters"

2. Select "Temperature Control"
3. Use the slider to set your desired brewing temperature (175°F-205°F)
4. Tap "Save"

Smart Home Integration

Schedule brewing times, adjust settings, and monitor your coffee maker remotely through the companion app or voice commands.

To set up voice assistant integration:

1. Ensure your coffee maker is connected to Wi-Fi
2. Download and install the CaféTech mobile app
3. Follow the in-app instructions to connect with Amazon Alexa or Google Assistant
4. Once connected, you can use commands like:
    - "Alexa, ask CaféTech to brew coffee"
    - "Hey Google, tell CaféTech to make an espresso"

 App Interface Screenshot

Customizable Brewing Profiles

Create and save up to 10 personalized brewing profiles with your preferred settings.

To create a new profile:

1. From the main menu, tap "Profiles" > "Create New"
2. Enter a name for your profile
3. Set your preferences:
    - Grind size (1-18, fine to coarse)
    - Coffee strength (mild, medium, strong)
    - Water temperature (175°F-205°F)
    - Brew volume
    - Milk frothing level (if applicable)
4. Tap "Save Profile"

To use a saved profile:

1. From the main menu, tap "Profiles"
2. Select your desired profile
3. Tap "Brew Now"

Scheduling Brew Times

1. From the main menu, tap "Schedule"
2. Tap "Add New Schedule"
3. Set the time, days, and brewing profile
4. Toggle "Enabled" to activate the schedule
5. Tap "Save"

Cleaning and Maintenance

Daily Cleaning

- Empty and rinse the drip tray
- Rinse the carafe and filter basket
- Wipe the exterior with a damp cloth

Weekly Cleaning

- Clean the grinder using the cleaning brush
- Wash the water tank and carafe with mild soap
- Clean the milk frother (if used)

Self-Cleaning System

The BrewMaster Pro 5000 features automated cleaning and descaling programs.

To run the cleaning cycle:

1. From the main menu, tap "Maintenance" > "Cleaning Cycle"
2. Follow the on-screen instructions
3. The cycle takes approximately 15 minutes to complete

Descaling

Depending on water hardness and usage, descale every 3-6 months:

1. From the main menu, tap "Maintenance" > "Descaling"
2. Empty the water tank and remove the water filter
3. Fill with water and add descaling solution as directed
4. Follow the on-screen instructions
5. The complete descaling process takes approximately 30 minutes

Troubleshooting

Problem	Possible Cause	Solution
Coffee maker won't turn on	Not plugged in or power outage	Check power connection and circuit breaker
Weak coffee	Too little coffee, too coarse grind, or water too cool	Increase coffee amount, use finer grind, increase water temperature
Coffee overflows	Too fine grind or too much coffee	Use coarser grind or reduce coffee amount
Grinder not working	Bean hopper empty or foreign object in grinder	Refill beans or check for blockage
Error on display	Various issues	Note error code and contact customer support
Wi-Fi connection issues	Signal problems or incorrect password	Move closer to router or verify password
